

# Cloud Strategy Workshop

Create the plan that will ensure success.

Alchemy's **Transform** practice leverages emerging technology to drive business outcomes. A modern data-center is necessary to support the innovations, analytics and powerful applications of tomorrow. Companies desire a more efficient and agile posture through automation and cloud adoption.

Alchemy can help organizations on their digital transformation journey through our expertise in cloud strategy and architecture, data-center transformation, workflow automation and robotic process automation (RPA).

**Let the transformation begin.**

**ALCHEMY**  
TECH GROUP

Alchemy Technology Group is an industry leading IT advisory, consulting, and reseller firm focused on transformational excellence.

## Assessment Overview

As organizations continue to adopt public and hybrid-cloud, a well-defined strategy is critical to realize the cost optimization, increased security and operational efficiencies that the public cloud can offer. Conversely, a poorly designed cloud architecture can increase operational costs, decrease security and hinder agility and innovation. Understanding what, why and how to properly adopt cloud services is an important step to achieve success.

Alchemy Technology Group, Inc. (Alchemy) has developed a comprehensive Cloud Strategy Workshop that allows us to review your current and future business objectives, compliance and governance requirements and develop the right strategy that allows for operational and cost efficiencies while remaining secure and compliant.

## Methodology

### Discovery

- Review the business objective and cloud initiatives
- Review compliance objectives
- Review strategy from a SaaS, IaaS, and PaaS perspective
- Review sanctioning processes

### Gap Analysis

- Identify deficiencies in the current Cloud Strategy
- Identify operational changes that will need to occur in order to support the environment
- Identify compliance gaps that may need to be addressed
- Cost optimizations
- Procurement
- Change Management
- Technical areas that may be covered:
  - *Identity*
  - *Network*
  - *Compute*
  - *Provisioning*
  - *Security Stack*
  - *VPC, VNET, or Project layouts (AWS, AZURE, GCP)*

## Outcome

At the end of this engagement, you'll have a clear Cloud Strategy document, complete with a gap analysis and a phased roadmap to help pave the way for a successful cloud adoption.
